

Mitie Air Conditioning and Renewable Energy

PROJECTS

An industry-leading AC and renewable energy contractor

As an industry-leading AC and renewable energy contractor, we work with clients nationally to deliver more efficient businesses that give due consideration to comfort, wellbeing and the environment.

Our strategic outsourcing services mean we don't just look after clients' facilities, but also their energy and people.

The breadth of sectors in which we operate stands testament to 20 years' service to a long list of satisfied clients across retail, banking, transport, education and more.

We provide design, supply and installation of air conditioning and renewable energy systems for commercial, industrial retail and domestic premises.

Keen to explore renewables? Our offer includes the full range of renewable technologies, including heat pumps and photovoltaic panels.

We provide turnkey, end-to-end solutions with fully costed and evaluated proposals plus exacting self-delivered installations.
